

McGreen Minerals USA

KDONOL –KFT

(Organic polymer base LEVELING AGENT for polyester FABRICS)

KDONOL-KFT: Is powerful LEVELING and DISPERSING AGENT, which have natural properties and reduce cost and pollution about 50%. Its a new concept in dyeing industries.

KDONOL-KFT: For high temperature dyeing of polyester fibers with disperse dyes. Synchronizes the exhaustion of dyes thus promoting level dyeing from the beginning of dye cycle. It also promotes migration and accelerates dye diffusion into the fiber with no retarding effect . DUE TO POLYMER BASE ITS VERY EFFECTIVE TO PREVENT CREASE ON POLYSTER FABRICS USAGE:--- 200 GM - 300 GM

Chemical structure

ORGANIC raw-material CRONA- ORE collected from lakes and rivers by mining and processing by **Mcgreen USA**

NOTE :----
